		less Discount (from above)	\$
		plus GST (if applicable)	\$
		Total	\$

Maintenance Terms and Conditions

ITS will provide the customer with all patches and upgrades of SPACE GASS and its optional modules licensed to the customer that become available during the term of the subscription. These provisions do not include increasing the number of licensed copies of SPACE GASS or its optional modules nor do they include licensing the customer for any new optional modules released for the first time during the period of the maintenance subscription.

ITS will notify the customer by email or via an automated message from within SPACE GASS whenever a new patch or upgrade becomes available. Delivery of the patch or upgrade will be via a download link contained in the notification message.

A maintenance subscription for a network version of SPACE GASS must include all the licences attached to the network lock. Furthermore, any new licences purchased for that lock during the period of the maintenance subscription must be added to the subscription and the appropriate pro-rata maintenance fee paid.

Maintenance renewals always start from the expiry date of the previous subscription regardless of when the renewal payment is made.

ITS will provide email, fax and telephone support on a business day basis during the hours from 9:00am until 5:00pm Australian Eastern Standard Time. Such support shall include the diagnosis and resolution of installation or operational problems that prevent SPACE GASS from running or result in performance that is below the published capabilities of SPACE GASS.

ITS will also provide advice on modelling issues related to optimization and how to identify and resolve ill-conditioning, instability and convergence problems, however this will be of an advisory nature only without any guarantee of a resolution.

ITS will not provide advice on structural engineering design, but may, at its sole discretion, suggest ways of modelling common engineering problems in SPACE GASS. ITS will not be held responsible for the consequences of providing such suggestions.

ITS will commence work on resolving installation or operational problems within one hour of notification and will engage staff during business hours to find an acceptable solution. ITS will commence work on providing advice for modelling issues within two hours of notification.

ITS will not be required to provide support for SPACE GASS problems caused by a deficiency or fault in the customer's computer system or network, or caused by interference from a virus or any other software program that is not a part of SPACE GASS.
